NIGERIA

In order to create a world where every child, adolescent and young person is safe, protected and thriving, we must first know the facts.

In Nigeria, both girls and boys experience unacceptably high rates of sexual and physical violence

Percentage of females and males who experienced sexual or physical violence prior to age 18

Sexual violence: 25% females, 11% males
Physical violence: 50% females, 52% males

For many youth, the first experience of sexual intercourse is physically forced or coerced

(among those who had sexual intercourse before age 18)

Girls face particularly high risks of sexual violence, often with devastating consequences

15% of girls who experienced physically forced or coerced sex before age 18 became pregnant

Sexual violence is linked to negative health outcomes

- Experienced sexual violence in childhood: 35%
- Did not experience sexual violence in childhood: 23%

All data among 18–24 year olds

As reported by 19-24 year olds who reported having sexual intercourse in past 12 months

The Government of Nigeria launched the VIOLENCE AGAINST CHILDREN SURVEY Report in 2015 with support from CDC, PEPFAR, UNICEF and other partners.

For many youth, the first experience of sexual intercourse is physically forced or coerced (among those who had sexual intercourse before age 18)

Girls face particularly high risks of sexual violence, often with devastating consequences

15% of girls who experienced physically forced or coerced sex before age 18 became pregnant

Sexual violence is linked to negative health outcomes

- Experienced sexual violence in childhood: 35%
- Did not experience sexual violence in childhood: 23%
Perpetrators of sexual violence are often someone known to the child or adolescent

Most common perpetrators of first incident of sexual violence as reported by females and males who experienced sexual violence prior to age 18
