In Honduras, both girls and boys experience unacceptably high rates of physical, sexual, and emotional violence. Violence can occur in the home, community, and at school.

% of females and males who experience physical, sexual, or emotional violence prior to age 18

- **Physical Violence**: 32%
- **Sexual Violence**: 16%
- **Emotional Violence**: 15%

SCHOOL–RELATED PHYSICAL AND/OR SEXUAL VIOLENCE IMPACTS MANY STUDENTS IN HONDURAS

% of students who experienced one or more forms of physical and sexual violence* perpetrated by teachers and/or classmates

- **Female Students**: 12% (131,013)
- **Male Students**: 14% (162,676)

While school environments can enable violence, they also have a critical role to play in violence prevention and response. Schools can serve as protective spaces for children, acting as an important arena for broader social change to end violence both in and out of the schoolyard.

*Sexual violence is defined by four types of acts: unwanted sexual touching, attempted physically forced or attempted coerced sex, completed physically forced sex, and completed coerced sex.

STUDENTS EXPERIENCE PHYSICAL VIOLENCE PERPETRATED BY TEACHERS

In Honduras, a small percentage of male and female students experience teacher-perpetrated physical violence.

- % of students who experienced physical violence perpetrated by a male teacher
  - FEMALE: 1%
  - MALE: 1%

- % of students who experienced physical violence perpetrated by a female teacher
  - FEMALE: <1%
  - MALE: <1%

STUDENTS ALSO EXPERIENCE PHYSICAL VIOLENCE PERPETRATED BY CLASSMATES

Physical violence among classmates is most likely to occur between the same sexes. Overall, male students are more likely to perpetrate violence against a classmate.

- % of students who experienced physical violence perpetrated by a male classmate
  - FEMALE: <1%
  - MALE: 7%

- % of students who experienced physical violence perpetrated by a female classmate
  - FEMALE: <1%
  - MALE: 3%

FEMALE AND MALE STUDENTS EXPERIENCE SEXUAL VIOLENCE

Students experience similar rates of sexual violence perpetrated by classmates. In Honduras, a small percentage of students report experiencing sexual violence perpetrated by teachers.

- % of students who experienced one or more forms of sexual violence perpetrated by classmates
  - FEMALE: 1%
  - MALE: 2%

- % of students who experienced one or more forms of sexual violence perpetrated by teachers
  - FEMALE: <1%
  - MALE: <1%
PHYSICAL VIOLENCE CAN HAVE HARMFUL CONSEQUENCES

In Honduras, students are more likely to experience physical consequences from violence perpetrated by male classmates. Consequences of violence include bruises, cuts, scratches, sprains, dislocations, blistering, broken bones, permanent injury and/or disfigurement.

THE HONDURAS VIOLENCE AGAINST CHILDREN SURVEY REPORT

The Government of Honduras launched their Violence Against Children and Young Women Survey (VACS) Report in 2019. The VACS are nationally representative household surveys of children and young adults ages 13 to 24 years that measure the prevalence and circumstances surrounding emotional, physical, and sexual violence against males and females in childhood, adolescence, and young adulthood. Through USAID’s Higher Education Solutions Network (HESN), AidData conducted a secondary analysis of the (VACS) data to identify the prevalence of school-related gender-based violence, as well as details on violence perpetration, victimization risk, and post-violence behaviors for girls and boys in Honduras.

SOLUTIONS TO PREVENT SRGBV

SRGBV impacts children around the world, but it doesn’t have to be this way. For more research and evidence-based interventions to prevent school-related gender-based violence, visit: togetherforgirls.org/schools
